

Finance & AI Data Analyst - Team Assessment Task

Guidance for Success

This assessment is designed to test how well you **apply AI, finance, and strategy together**—not whether you are an expert in any one area.

✓ **If you're stronger in finance**, focus on **structuring strong monetisation models** while considering **how AI enhances financial decisions**.

✓ **If you're stronger in AI & data science**, focus on **leveraging AI to create smart financial insights** while ensuring monetisation is clear.

✓ **If you're a balanced generalist**, focus on **creating a clear, data-backed business case** that connects **finance, AI, and investor strategy**.

There are **many ways to succeed** in this assessment. The best responses will **challenge assumptions, provide clear business reasoning, and think critically about AI adoption and monetisation**.

Objective

This assessment is designed to evaluate your ability to apply **AI-driven financial modelling**, develop **monetisation strategies**, and refine **investor-facing narratives** while demonstrating **cross-functional collaboration skills** within a team environment. The estimated time to complete this task is **8-10 hours**.

Submission Format Options

You may submit your assessment in one of the following formats:

-  **Structured Report (PDF)** – A traditional business-style document with clear sections and written analysis.
-  **Interactive Presentation (Slide Deck, Data Dashboard, or Notebook)** – Ideal for candidates who prefer a **visual and analytical approach**.

Regardless of the format you choose, make sure your insights are **clear, well-structured, and backed by data**.

Context: FilmFusion Business Model & Strategy

You are part of a newly formed **Finance & AI Data Team** within Risidio, working alongside the **Development Team** (building the platform) and the **Design Team** (UX/UI & branding). Your role is to explore **monetisation strategies**, pricing models, and AI-powered financial solutions for **FilmFusion**—a next-generation Web3 film finance platform.

This assessment is based on the **FilmFusion Finance & AI Input Document**, which provides key business context, financial benchmarks, AI-driven features, and investor priorities. **Use this document as a foundation for your responses.**

Your task is structured into **four key areas**:

Part 1: Monetisation Model Development (3 hours)

Using the provided **revenue potential estimates and pricing benchmarks** from the **Input Document**, develop an AI-assisted **monetisation model** for FilmFusion.

1. Defining Revenue Streams

- Identify **at least three** core revenue streams FilmFusion could use, refining ideas outlined in the input document. Consider:
 - **Transaction-based revenue** (e.g., marketplace fees, NFT sales, smart contract execution fees)
 - **Subscription-based models** (e.g., premium investor analytics, filmmaker AI insights)
 - **AI-driven monetisation** (e.g., predictive financial analytics as a service, tokenized risk scoring, revenue-sharing mechanisms)

2. Pricing Models & Transaction Fees

- Develop a **pricing strategy** for at least **one** revenue stream, using the comparative benchmarks provided. Consider:
 - Tiered pricing, pay-per-use, commission-based models, or hybrid approaches
 - How AI enhances pricing efficiency (e.g., predictive pricing, risk-adjusted transaction fees)

Deliverable: A structured **one-page revenue model proposal**, integrating insights from the **FilmFusion Input Document**.

Part 2: AI-Driven Premium Features & Strategic Recommendations (2 hours)

FilmFusion is exploring **AI-driven premium features** that provide value to investors and filmmakers. Use the AI strategies outlined in the **Input Document** to build upon FilmFusion's existing vision.

1. AI-Powered Features for Monetisation

- Identify **one AI-driven premium feature** that FilmFusion could offer, drawing from the ideas in the **Input Document**.
- Justify its potential revenue impact and feasibility.
- Provide a basic outline of how the AI component would function.

2. Cross-Team Collaboration Insight

- Consider how your proposed feature would interact with:
 - The **Development Team** (technical implementation challenges)
 - The **Design Team** (UX/UI implications, user engagement strategies)

Deliverable: A concise slide or report (bullet points acceptable) outlining the premium feature and collaboration insights.

Part 3: Data Analysis Task (1.5 hours)

This section tests your ability to extract insights from financial data. You have been provided with a **mock dataset** (in the Input Document) containing:

- Investor activity logs (investment frequency, average ticket size, user engagement trends)
- Revenue by pricing model (Subscription, NFT sales, Smart Contract Fees over 12 months)
- AI adoption metrics (percentage of users opting for AI-powered insights)

Task:

- **Analyze the dataset** and identify one key **insight** that could influence FilmFusion's revenue model or pricing strategy.
- Write a **brief summary (150-200 words)** explaining your findings and how they could be applied to improve monetisation.

Deliverable: A short written analysis highlighting the key takeaway from the data.

Part 4: Investor-Facing Product Narrative Refinement (2 hours)

Investors need a **clear, compelling story** about FilmFusion's business potential. Use the **Investor Pitch Structure** from the **Input Document** to craft a compelling message.

1. Refining the Investor Narrative

- Write a **300-word investor pitch summary** explaining how FilmFusion's **monetisation model, AI-powered financial tools, and Web3 infrastructure** create a **compelling investment opportunity**.
- Emphasise **scalability, innovation, and market differentiation**.

Deliverable: A polished, investor-ready pitch summary.

Bonus Question: Simulating Team Collaboration (Optional)

FilmFusion's Finance & AI Data Team will consist of **4-5 people** working cross-functionally with Dev and Design teams. **If this were a real project**, how would you structure responsibilities within a small team?

Task:

- Briefly outline **how you would divide responsibilities** within a **4-5 person team** to complete this assignment.
- How would you ensure **alignment between Finance, Dev, and Design teams**?

Deliverable: A short bullet-point response explaining your approach to team collaboration.

 **Submission Deadline & Contact:** Submit your assessment within the timeframe provided to humanresources@risidio.com.
